-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 February 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 02/12/04. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 9 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

With respect to claim 9, the method does not produce a tangible result. It is unclear how the result is being stored, displayed or used in any tangible manner. To view the new guidelines for 35 U.S.C. 101 please view the following OG notice <http://www.uspto.gov/web/offices/com/sol/og/2005/week47/patgupa.htm>

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 rejected under 35 U.S.C. 102(b) as being anticipated by Ament et al. (U.S. Patent No. 4,653,315).

With respect to claim 1, Ament et al. disclose the engine top dead center locating method including a reference signal-generating device that generates a reference signal (see e.g. col. 1, lines 35-36 and col. 2, lines 15-27); a rotation angle detecting section that generates an output signal in response to the reference signal (see e.g. Fig. 1, item 16, col. 2, lines 17-20); a feedback control section that determines a rotational angular speed based on the output signal and performs feedback control to calculate a rotation angle (see e.g. col. 4, lines 20-23); and a free-running range change device that narrows a free-running range of the rotational angular speed at a time of starting settling of the rotation angle (see e.g. Fig. 6, col. 7, lines 5-44).

With respect to claim 2, Ament et al. disclose the invention as claimed including the free-running range is made narrower than a given free-running range of the feedback control section (see e.g. col. 9, lines 43-68).

5. Claims 3-8 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
